

Panduan Konfigurasi L^AT_EX di Visual Studio Code

1. Instalasi L^AT_EX *compiler*

(a) Windows (pilih salah satu):

- Instal TeX Live (<https://www.tug.org/texlive/windows.html#install>), atau
- MiKTeX (<https://miktex.org/>)

(b) Mac OS: unduh dan instal MacTeX (<https://tug.org/mactex/mactex-download.html>)

(c) Linux: Instal paket TeX Live (`sudo apt install texlive`)

2. Konfigurasi Visual Studio Code

(a) Instal LaTeX Workshop extension.

(b) Buka menu View → Command Palette...

(c) Pilih atau cari Preferences: Open User Settings (JSON)

(d) Tempelkan konfigurasi di bawah ini di Settings tersebut.

```
{
  "latex-workshop.latex.tools": [
    {
      "name": "xelatex",
      "command": "xelatex",
      "args": [
        "-synctex=1",
        "-interaction=nonstopmode",
        "-file-line-error",
        "%DOC%"
      ]
    },
    {
      "name": "biber",
      "command": "biber",
      "args": [
        "%DOCFILE%"
      ]
    }
  ],
  "latex-workshop.latex.recipes": [
    {
      "name": "xelatex -> biber -> xelatex*2",
      "tools": [
        "xelatex",
        "biber",
        "xelatex",
        "xelatex"
      ]
    }
  ]
}
```
